EDUCATION

New York University | *MS in Computer Science*

Sep. 2023 – Jan. 2025

Tianjin University | *BS in Construction Management*

Sep. 2018 – Jun. 2023

TECHNICAL SKILLS

Languages : C/C++, Java, Python, JavaScript/TypeScript, Kotlin, Rust, SQL

Front End : Vue.js, React.js & React Native, HTML/CSS

Back End: Spring Boot, Node.js, Django, Netty

Data : Redis, PostgreSQL, MongoDB, Hadoop, Spark

Others : Kubernetes, Docker, Kafka, gRPC, Jenkins

Certificates: AWS Certified Developer Associate (DVA-C02)

WORK EXPERIENCE

PayPal – Software Engineer @ San Jose, CA

Feb. 2025 – Present

- Built and maintained backend services processing billions in daily transaction volume using **Kotlin**, **Spring Boot**, and **PostgreSQL**, ensuring high availability and low latency for real-time payment systems.
- Developed efficient **Kafka** message queues for distributed event processing, utilizing Kafka proxies within **Kubernetes** to facilitate node operations and enhance system stability at scale.
- Enhanced system observability by implementing transaction tracing pipeline using **Sentry** and **Datadog**, enabling real-time monitoring and rapid debugging of production issues.
- Collaborated with product managers and cross-functional engineering teams to deliver features on schedule while contributing to engineering culture through code reviews and documentation.

PayPal – Software Engineer Intern @ Chicago, IL

May 2024 – Aug. 2024

- Developed B2B backend microservices using **Kotlin** and **Spring Boot** to process transaction events, calculate fees, and generate compliance reports for merchant billing platform.
- Optimized data pipeline efficiency by designing **Airflow** DAGs for scheduling **Spark** jobs, improving transaction verification and settlement workflows.
- Migrated data infrastructure from **AWS S3** to **GCP Cloud Storage** using **Scala**, demonstrating proficiency with cloud platforms and data engineering.

PROJECTS

AikiCard 🌐 | *React, Next.js, TypeScript, OpenAI API, Vercel*

Jun. 2025

- Built a web platform using **React** and **Next.js** with **TypeScript** that transforms EPUB books into interactive learning content, serving users with fast global access via **Vercel** edge caching.
- Implemented spaced repetition algorithm (SM-2) with progress tracking and adaptive review scheduling, demonstrating proficiency in **data structures** and algorithm design.
- Designed responsive UI with **React** components and **TailwindCSS**, optimizing for performance and user experience across devices.

AlgoAce 🌐 | *TypeScript, React, Chrome Extension, LLM*

Feb. 2024

- Built a Chrome extension using **TypeScript** and **React** to enhance algorithm learning on coding platforms, demonstrating browser-based development skills.
- Implemented real-time code analysis with **AST parsing** for pattern recognition, providing instant feedback and optimization suggestions to users.

Aiki 🍏 | *iOS, SwiftUI, OpenAI API, CloudKit*

Mar. 2024

- Developed iOS app using **SwiftUI** with intelligent content generation via OpenAI API, achieving 4.5+ App Store rating.
- Implemented efficient local storage with **Core Data** and cloud sync using **CloudKit**, ensuring seamless cross-device data persistence.
